Part C Instructions
JSON Web Tokens - jwt.io
Get up-to-speed with JSON Web Tokens. Get the JWT Handbook for free
English
JWT Debugger
Debugger
Introduction
Libraries
Ask
JSON Web Token (JWT) Debugger
Decode, verify, and generate JSON Web Tokens, which are an open, industry standard RFC 7519 method for representing claims securely between two parties.
Learn more about JWT
See JWT libraries
For your protection, all JWT debugging and validation happens in the browser. Be careful where you paste or share JWTs as they can represent credentials that grant access to resources. This site does not store or transmit your JSON Web Tokens outside of the browser.
JWT Decoder
JWT Encoder
Paste a JWT below that you'd like to decode, validate, and verify.
Generate example
ENCODED VALUE
Enable auto-focus
JSON WEB TOKEN (JWT)
